The Honorable Zell B. Miller
United States Senate
257 Dirksen Senate Office Building
Washington, DC 20510

Dear Senators Crapo and Miller:

In response to your letter of September 13, we write to express our serious concerns about the legislative proposal to expand regulation of the over-the-counter (OTC) derivatives markets that has recently been proposed by Senators Harkin and Lugar.

We believe that the OTC derivatives markets in question have been a major contributor to our economy's ability to respond to the stresses and challenges of the last two years. This proposal would limit this contribution, thereby increasing the vulnerability of our economy to potential future stresses.

The proposal would subject market participants to disclosure of proprietary trading information and new capital requirements. We do not believe a public policy case exists to justify this governmental intervention. The OTC markets trade a wide variety of instruments. Many of these are idiosyncratic in nature. These customized markets generally do not serve a significant price discovery function for non-participants, nor do they permit retail investors to participate. Public disclosure of pricing data for customized OTC transactions would not improve the overall price discovery process and may lead to confusion as to the appropriate pricing for other transactions, as terms and conditions can vary by contract. The rationale for imposing capital requirements is unclear to us, and the proposal's capital requirements also could duplicate or conflict with existing regulatory capital requirements.

The trading of these instruments arbitrages away inefficiencies that exist in all financial and commodities markets. If dealers had to divulge promptly the proprietary details and pricing of these instruments, the incentive to allocate capital to developing and finding markets for these highly complex instruments would be lessened. The result

would be that the inefficiencies in other markets that derivatives have arbitrated away would reappear.

It is also unclear who would benefit from the proposed disclosures and regulations other than whoever simply copied existing products and instruments for their own short-term advantage. Weakening the protection of proprietary intellectual property rights in the market arena would undercut a complex of highly innovative markets that is among this nation's most valuable assets.

While the derivatives markets may seem far removed from the interests and concerns of consumers, the efficiency gains that these markets have fostered are enormously important to consumers and to our economy. We urge Congress to protect these markets' contributions to the economy, and to be aware of the potential unintended consequences of current legislative proposals.

Yours truly,

Paul H. O'Neill
